

monsana ag >> who is who >> Literaturliste
Prof. Dr. Arneborg Ernst

Klinische Arbeiten (alphabetisch):

Die wissenschaftliche Literatur zu HNO-relevanten Themen ist breit. Allein durch Eingabe eines Stichwortes kann man bis zu 1000 Literaturzitate aus gängigen Datenbasen erhalten, wenn nicht sogar mehr. An dieser Stelle sollen vor allem ausgewählte, eigene Arbeiten und solche Veröffentlichungen berücksichtigt werden, die unsere Diagnostik- und Therapiestandards widerspiegeln. Damit ist die Auswahl naturgemäß subjektiv und unvollständig.

Bestellung von Artikeln in voller Länge bzw. Ansicht von Abstracts (außer bei Büchern) sind über Datenbasen - z.B. MEDLINE in den USA - möglich (z.B. <http://www.nlm.nih.gov>).

Scientific Literature (in alphabetical order)

The scientific literature about ENT related topics is very broad. By only entering one key word into a established database can get you a list of up to 1000 quotes from literatures if not more. This present list is meant to consider selected own works and publications that reflect our standards of diagnostics and therapy. This naturally makes the choice a subjective and incomplete one.

All listed articles or abstract views (except books) can be ordered in full length via databases, e.g. MEDLINE in the US (e.g. <http://www.nlm.nih.gov>)
